START.SMART.CHARGING.

**Stop paying for home charging,
start earning from it.**

Automatically charge your electric vehicle
when electricity is cheapest.
No hassle. No waste.

CenEnergy
by Belfius

**DISCOVER WHICH
CHARGING STATION
SUITS YOU.**

YOUR CHARGING STATION CHARGES... BUT NOT SMART.

Most charging stations start charging immediately. Regardless of peak hours, high tariffs or your solar energy. The result? You often charge exactly when electricity is most expensive.

OUR SOLUTION

CenEnergy turns your charging station into a smart charging system. We automatically control charging based on:

- > **low-cost hours**
- > **solar production**
- > **avoiding peak tariffs**

You charge when it makes financial sense, not when it happens by chance.

And that starts with the right charging station.

A CHARGING STATION THAT SUITS YOU. NOT THE OTHER WAY AROUND.

HOME CHARGING – AC CHARGING STATIONS

Ideal for daily use

- > Up to 22 kW
- > Compact & stylish design
- > Ready for smart control

For whom?

WHY CENENERGY?

> We make smart energy accessible, profitable and simple.

Smart from the start

Our charging stations are designed to charge intelligently, not just to pass through electricity.

Charging station management

Clear management of your charging station or charging network. Automatic billing and reimbursement, resulting in time savings.

Clear and intuitive app

Via our app, you set:
> when you charge.
> the maximum charging tariff you charge at.
> a clear overview of your charging sessions.

One partner, everything arranged

Analysis
Installation
Configuration
Monitoring
You don't need to figure anything out. We do it for you.

In-house technology

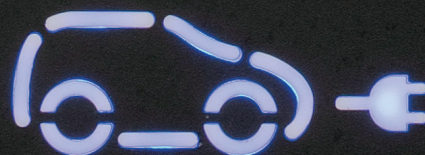

Always up to date with the latest developments and the most advanced technologies
Reliable, high-quality, safe and ready to grow with you.
